

We are looking for a senior consultant with expertise in health policy, health economics, public health or health services research to join Technopolis | Group | and support our work in policy research and evaluation in Europe

We are currently expanding our health policy practice and are looking for a Senior Consultant to join us and contribute to Technopolis' portfolio of projects. The Health team has currently the following priority areas: Biomedical research & innovation, Healthy ageing & health technologies, Global health research, and Pharmaceutical innovations and access to medicine. You will be working with the Group's Principal for Health and colleagues, supporting evaluations of public R&D programmes, impact assessments of public health policies and innovation in health systems and services.

The successful applicant will have demonstrated quantitative and/or qualitative analytical skills, excellent written and verbal communication skills, the ability to work effectively as a member of multidisciplinary teams, and a strong commitment to our core values of quality and integrity. Work experience in a research-based consulting environment and evaluation experience is a plus.

Projects and missions

- Collection and analysis of health-related quantitative data;
- Conduct literature review and telephone interviews;
- Contribute to writing of study reports and proposals;
- Identify business development and marketing opportunities;
- Contribute to shared learning and continuous improvement of our processes and practices.

Competences

- An academic background in health policy, health economics or public health at Masters level or above;
- A minimum of 5 years of work experience and practical knowledge of health policy in Europe;
- A good command of quantitative and / or qualitative research methods;

- The ability to write to a professional standard, in English and preferably in French;
- Self-motivation and ability to work independently as well as in multidisciplinary teams;
- Intellectual curiosity and flexibility to work across different disciplines
- The right to work in the European Union.

Work conditions

- Duration: Permanent position starting Jan 2019
- Work place : One of our Technopolis offices and may be discussed with potential candidates

Apply !

Please send CVs + cover letter + contact details of 1 reference (professional and/or academic) to recruitment@technopolis-group.com

Deadline : **5th of January 2019**

Only relevant candidates will be contacted for an interview

The Technopolis | Group | is an international policy research consultancy and a respected evaluation practitioner established in 1989. Technopolis has more than 100 consultants working across eight countries in Europe, offering a dynamic environment and exciting opportunities to work in multidisciplinary and international teams. We combine a unique set of capabilities and perspectives sourced from disciplines across the social sciences, health and life sciences, engineering, economics and management to support strategy, policy analysis, foresight, impact assessment and evaluation to respond to societal challenges. We pride ourselves on rigorous and objective research, seeking innovative solutions to improve governance, policy and decision-making. Our clients include government departments, research councils, innovation agencies, health service providers, the European Commission, the World Health Organisation, the OECD and medical charities.

Being a Technopolitan is to:

- Put clients, independence and objectivity at the heart of what we do
- Seek innovative solutions and methods, aiming for 'thought leadership' and always be ready to learn
- Organise as 'one firm' to deliver the best teams and expertise
- Maintain a caring internal culture that encourages debate and respects our obligations to each other, our clients and society
- Share our learning with others
- Recruit, develop and promote excellent people to work in teams, based on their ability to live up to our values
