

We are looking to recruit a consultant with expertise in health policy, health economics, public health or health services research to join Technopolis Group and support our work in policy research and evaluation in Europe. The Health team currently works on projects in the following areas: Biomedical research & innovation, Healthy ageing & health technologies, Global health research, Pharmaceutical innovation & access to medicine, and Health systems & healthcare delivery. You will be working with the Group's Lead for Health and other colleagues from the UK and European offices, supporting evaluations of public R&D programmes, impact assessments of public health policies and innovation in health systems and services.

The successful applicant will have demonstrated quantitative and/or qualitative analytical skills, excellent written and verbal communication skills, the ability to work effectively as a member of multidisciplinary teams, and a strong commitment to our core values of quality and integrity. Work experience in a research-based consulting environment and evaluation experience is a plus.

Although the role is primarily focused on the UK market, there will also be opportunity to work on EU and other international markets.

Full time / permanent

London or Brighton (UK)

Competitive salary with bonus scheme, personal pension and other benefits

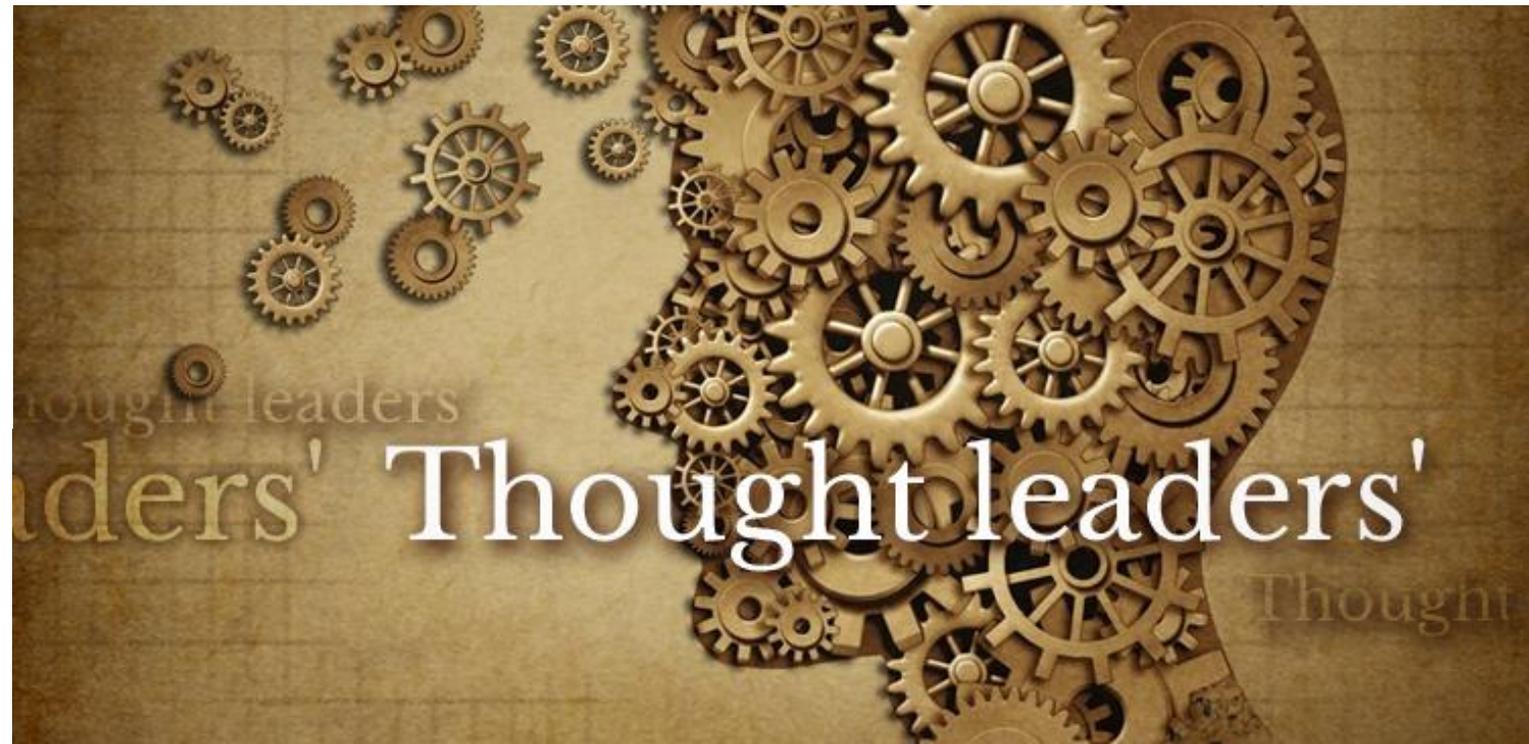

Technopolis Group is an international research and consulting organisation with offices throughout Europe and a growing business in emerging economies.

Our main business is the conduct of policy studies, evaluations and socio-economic impact assessments for various regional, national and international organisations. We work across a number of policy areas, ranging from science, technology and innovation to higher education, green economy and health and life sciences.

Clients are predominantly public or third sector and include various UK government departments, Wellcome Trust, Cancer Research UK, European Commission and international bodies, e.g. the EIB, OECD and WHO. We have grown steadily over the past 30 years and are continuing to expand internationally, with around 140 consulting staff working across 12 offices, from Brighton in the UK to Vienna in Austria.

The UK team is growing strongly and is expanding in its core business and in several new policy domains, both in the UK and internationally.

We are expanding our health and life sciences team, specifically to support innovation programme evaluations and strategic studies.

Duties

- Collection and analysis of quantitative data
- Conduct literature review, telephone interviews and field work
- Contribute to writing of study reports
- Ensure individual assignments are delivered to plan
- Identify business development and marketing opportunities
- Help to grow the practice through preparing tenders including the design of robust and innovative methodologies

Your profile

We are looking for someone with at least 2 years of relevant work experience in a consulting environment, health services or through experience in the charity sector, government departments and their related agencies.

More specifically, you must have:

- An academic background in health policy, health economics, public health or similar
- A thorough practical knowledge of current policies in health and life sciences
- A good command of qualitative and / or quantitative evaluation methods
- Understanding of theory-based or realist evaluation methods
- Proficiency in office software packages
- The ability to write well and to a professional standard, in English.
- Self-motivation, intellectual curiosity and an ability to work independently
- A willingness to travel and work in international teams

Other desirable attributes:

- Ability to propose, sell and lead evaluations
- Ability to prioritise and multi-task, and work under strict deadlines
- Excellent oral communication skills
- Knowledge of statistics software packages
- Intellectual curiosity and flexibility to work across different disciplines
- Ability to deliver client ready reports on time and budget

We are always pleased to hear from international candidates, however you must have the right to work in the UK already. We are an equal opportunities employer and welcome applications from all suitably qualified persons.

What we offer

- Competitive salary and performance-related bonus scheme, along with 25 holiday days each year, private healthcare and a personal pension. The company also operates a cycle-to-work scheme
- Challenging and varied projects conducted in a dynamic environment and working closely with senior policy advisors in government
- Opportunity to travel across Europe and internationally working for some of the world's most important and influential public bodies
- Positive and diverse working atmosphere with like-minded professionals working in London and Brighton, whilst also being part of a larger international research company with multiple opportunities for international cooperation
- Opportunity for training and career progression, from thematic and methodological perspectives to business development and company leadership.
- Opportunity for staff to become shareholders as they progress to more senior levels

The position would be full time with the potential for some level of flexible working, to fit with family and other commitments.

This will be a permanent position, following the successful completion of a 6-month probationary period

How to apply

To apply, please upload a copy of your CV [on our website](#), together with a covering letter explaining your interest in the specific job, how your skills and experience meet our requirements and why you believe you would be a good addition to the Technopolis team.

For shortlisted candidates the assessment process will comprise three further steps: a short, informal telephone interview to discuss your ambitions; a more formal interview by telephone with a selection panel; and a final interview in person at our offices in Brighton where you will have the chance to meet the team and see our projects in action.

Closing date for receipt of applications is **31 August 2019**
